

# Program Assessment Just Got Smarter, with *Insights* for Canvas Outcomes

**Insights** for **Canvas Outcomes** brings a powerful set of tools for systematic assessment with Canvas Outcomes. Our Curriculum Map can better align standards like AACN Essentials (or industry-specific skills models) to your course and program learning outcomes, let you plan key assessments, then gather evidence and data for your findings.

**Support for Multiple Outcomes and Standards, with Versioning**

**Curriculum Mapping Integrated with Assessment Planning**

**Plan for both Course-Embedded and Juried Assessment**

**Role-Based Dashboards and Self-Service Analytics**

## Empower Faculty.

Faculty can view course data this term—and last term, as well as compare results and reflections.

## Improve Outcomes.

Powerful modeling and authoring tools for skills that keep up with program and career evolution.

## Streamline Success.

Keep up with program review and accreditation, especially with new demands for equity and workforce alignment are streamlined with **Insights**.

## Program Coordinators Have Never Had More Powerful Tools.

**Insights** for **Canvas Outcomes** turns Canvas into your central hub for program assessment. From our powerful curriculum maps, to their integration with our assessment planner, you can now track outcome and skills mastery to demographics and course type, and see how it is all performing in *real time*.

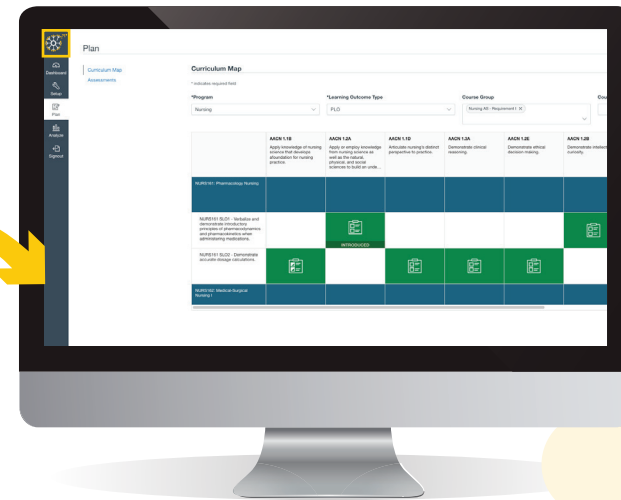

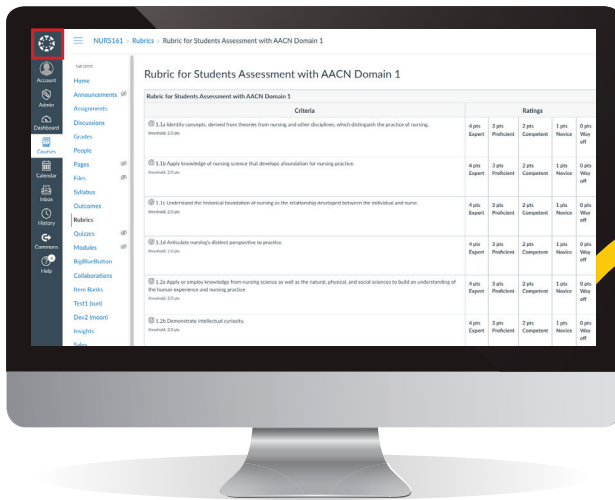

*We do the evidence collection and data management so you can focus on what truly matters to your professional students: teaching them for the 21st Century.*

# Continuous improvement in one application

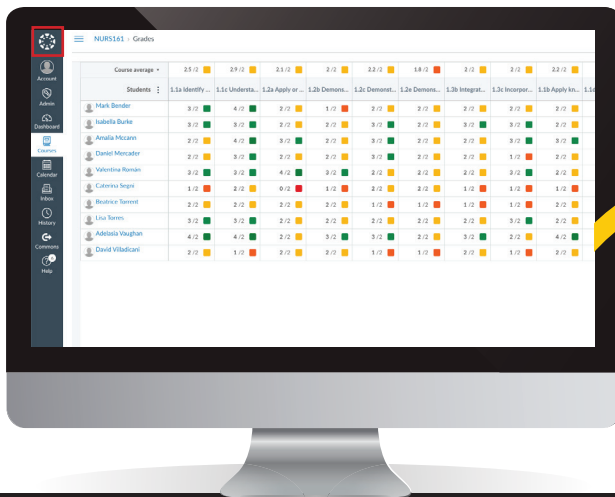

Canvas supports using rubrics and learning outcomes in Speedgrader.

Insights helps you align those to multiple standards, changing the game for evidence and data collection.

The Learning Mastery Gradebook can show how students master outcomes in a course.

Faculty and coordinators can use Insights to add juried assessment, curriculum review, and shared quality narratives.
