The Resume

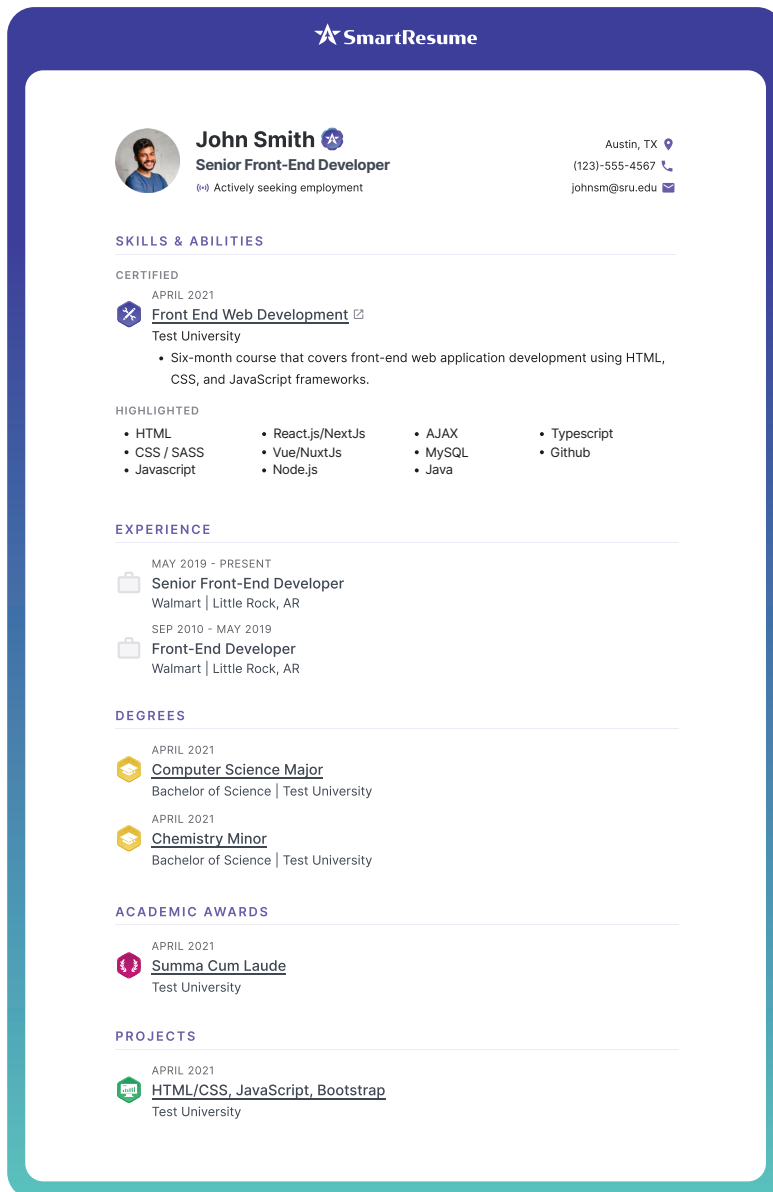

SmartResume gives employers deeper insights into a candidate's skills and abilities, while simultaneously protecting both parties from unconscious bias.

- SmartResumes are anonymized to hide details like race, gender, and ethnicity until the right moment in the hiring process.
- Our resume builder makes it easier than ever to build a thorough talent profile.
- Unlike online job seeker profiles, a SmartResume can be used anywhere one looks for work.
- All credentials are securely stored on a permissioned blockchain for verification purposes.

The Galaxy's First Certified Talent Marketplace

Any SmartResume user can opt-in to our Certified Talent Marketplace in order to be discovered, recruited, and hired by employers. Employers discover talent based on skills, competencies and credentials instead of social connections, profile photos, or arduous job applications.

The Marketplace

With verified credentials at the heart of our marketplace design, new talent discovery and recruiting capabilities become possible.

-  Job seekers have the controls to determine when and where they want to be recruited.
-  At the right time, employers can unlock a SmartResume to learn a job seeker's identity.
-  Employers can search and discover talent based on a diverse range of verified credentials including digital badges and comprehensive learning records.
-  Certified Talent Alerts automate the process of talent discovery.
-  Unconscious bias protection combined with verified insights allow employers to hire diverse talent more efficiently.
