

Powering Up Your Canvas Course, Part 10

Beginner

1 Use the Canvas Teacher App

If you would like to grade on-the-go, then use the Canvas Teacher App. It also provides you with the ability to communicate with your students using an announcement or a message and can also update course content.

2 Embed a Video

Embedding videos in your Canvas course give students the opportunity to either review material you have covered in class or it gives students a chance to learn on-the-go when they miss for extra curricular activities. There are many ways to insert a YouTube video. Check out the link below for a how-to.

3 Change Course Section Names

Renaming your sections can be helpful if you are utilizing the Canvas gradebook. Instead of a course number, you can rename it to read which class period and content area. Go to Settings > Sections. Then edit to rename.
