Powering Up Your Canvas Course, Part 2

ADVANCED

1

Try Mastery Paths

If you are interested in differentiating for your students, try mastery paths. Performance on a pre-assessment designates conditional assignments for students. By doing this, you put each student on his own learning path.

2

Use the Redirect App

Have a page students need direct access to? We tend to put these links on a home page, but if you want to provide course members access from anywhere in the course, use the redirect app. This app will allow you to customize your course navigation.

3

Add a FlipGrid Assignment

FlipGrid, now FREE for teachers, is a great tech tool to integrate into your course. It is a video discussion platform. Let students discuss a book, explain a math problem, practice foreign language, and more all within the safe confines of your Canvas course.
