

CANVAS MODULES

EDUCATION SERVICES | ADOPTION CONSULTING

OR

Which of these would you rather utilize with your students?

BUILDING A CANVAS COURSE?
It all starts with Modules!

WHAT ARE MODULES?

Think of each module like a tab in your perfect binder! Your pages, assignments, quizzes, files, and links are the “stuff” behind each tab.

WHY USE CANVAS MODULES?

Modules act as a great table of contents to outline and organize your course and provide completion requirements and flow for students. Each content item will automatically get a previous and next button, and teachers can control how students interact with content.

TABLE OF CONTENTS

- Module 1
 - My Content Page
 - My Assignment
- Module 2
 - My Content Page 2
 - My Discussion
- Module 3
 - My Link
 - My Quiz
- Module 4
 - My Content Page 3
 - My Assignment 2
- Module 5
 - My Link 2
 - My File

Module 1

Module 2

Module 3

Module 4

Module 5

MODULES QUICK TIP: Just like removing something from the table of contents doesn't actually remove the page from the book, deleting from modules does not delete the content. It just removes it from the flow of the course outline.

MODULES

EVERYTHING GOES IN HERE!

Build your modules first. Think about how you organize your class and design your modules in that way (units, weeks, themes, etc).

CONTENT

SHARE INFO WITH THESE!

Pages, files, external web links, and your favorite online tools go in your modules. Add content to pages and embed links and tools on your pages with the Rich Content Editor.

ASSESSMENTS

EVALUATE STUDENTS WITH THESE!

Discussions, assignments, and quizzes allow you to assess students, create collaborative activities, and drive student interactions. These assessments go in your modules too!
