## **Canvas Student Instructional Impacts** (SII) Connector

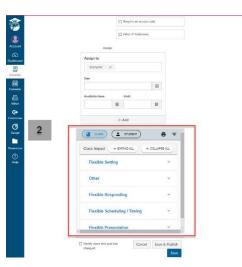

## **Overview SII**

SII is a connector embedded in Canvas Announcement, Discussion, Assignment and Quiz pages. SII displays accommodations for all students with an IEP in the course. IEP accommodations are displayed within Canvas to make it as easy as possible for teachers to develop differentiated content based on their student's needs.

There are two views of SII, one while in 1 View mode of a Canvas page, and the other when in 2 Edit mode. The View mode does not display any student proprietary information to allow using Canvas in the classroom. The Edit view mode is for the teacher and provides a detailed list of the students and their accommodations.

When in the 2 Edit mode, SII will display details about the accommodations of students in your course.
