

HELP YOUR FACULTY TRANSFORM GRADING INTO LEARNING

Gradescope is the leading feedback and assessment platform that helps you seamlessly administer and grade all of your assessments, whether online or in-class. Leveraging digital rubrics and AI, **we have helped over 1,000 institutions and 50,000 instructors cut grading times by up to 80%**, increase grading consistency and quality of feedback, and dramatically improve instructor/TA workflow vs. traditional grading.

Gradescope Impact

DRAMATICALLY CUT GRADING TIME

Gradescope's AI-assisted grading and flexible rubrics reduce time spent on grading, so they can spend more time teaching.

"Gradescope is a game changer. In large enrollment classes with multiple TAs, it is much easier now to have graders work in parallel grading homework and exams."

– Phill Conrad, UCSB

UNDERSTAND LEARNING TRENDS

Get per-question and per-rubric item statistics to identify gaps in knowledge and help instructors modify content and administrators evaluate course trends.

"The best thing is having the scoring details online. This lets us share more with the students. And later, we can analyze how well the questions worked, when we are not in the middle of the grading rush."

– Cliff Shaffer, Virginia Tech

SCALE PERSONALIZED AND PROMPT FEEDBACK

Enable instructors to promptly provide individualized, actionable, and formative feedback to students, increasing learning outcomes and retention.

"Gradescope is rocket fuel for grading. My students love getting feedback just a few hours after their quizzes — a pace I can only achieve with Gradescope."

– Warren Hoburg, MIT

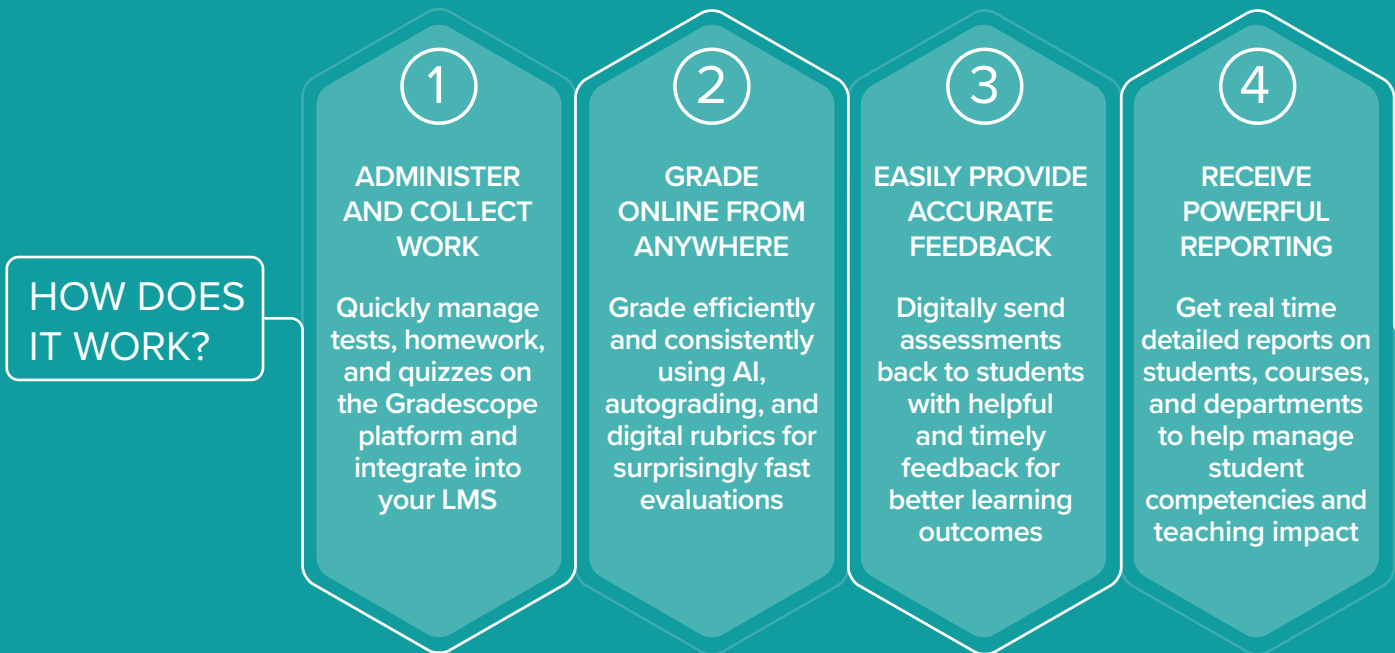

REDUCE BIAS AND INCREASE CONSISTENCY

By anonymizing answers and creating a consistent rubric across graders, university leaders can take an active role in creating an anti-bias learning environment.

"You can review all grades across the class and decide whether you think the grading has been fair and review everything, make changes, etc., before publishing grades to students."

– Jennie D'Ambroise, SUNY
