# enflux

Academic Intelligence for Student Success

Unlock the Power of Data with Enflux

Enflux is a comprehensive analytics and decision support system that streamlines data management and empowers effortless programmatic assessment for higher education. Enflux provides actionable insights for informed decision-making, enabling assessment and academic leaders to accurately measure student performance, program effectiveness, and accreditation compliance.
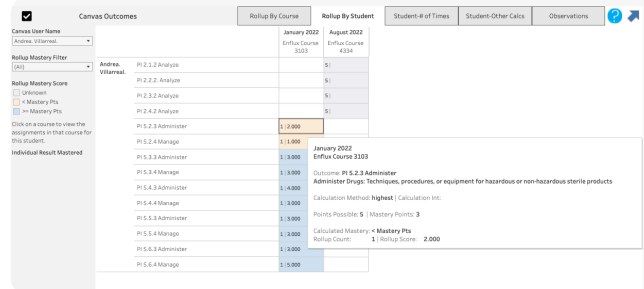

Enflux helps educators:

- Enhance the assessment process by eliminating the need for manual spreadsheet tracking

- Minimize student attrition by providing timely and accurate feedback on student performance

- Improve program quality through ongoing measurement and monitoring of curriculum and student performance

- Simplify accreditation compliance by automating the tracking and reporting of key performance metrics

Streamlining data management for better student outcomes

Centralize your data with ease. Our user-friendly platform consolidates data from isolated systems into a centralized hub with customizable dashboards, reducing costs, improving program evaluation, and fostering student success and retention.

Informed decisions with real-time insights. Enflux enables collaboration among faculty and staff to track strategic plan progress, assess student and curriculum effectiveness, and identify areas for improvement, leading to increased student success and program excellence.

Intuitive action planning & management. Our comprehensive decision support system provides data, insights, and alignment with accreditation standards, strategic plan goals, and committee initiatives. With the ActionPlan® Management System, track and evaluate data-driven decisions for improved collaboration and accountability.

Track accreditation compliance effortlessly. Enflux provides institutions with the necessary tools for conducting thorough self-studies and staying updated on their performance against ACPE standards and benchmarking with peers and nationally.

70+ universities   **100,000** students supported   **10** billion datasets processed

Technical specifications

Integrations

Enflux partners with the leading learning management systems and assessment solutions, such as ExamSoft, Canvas, and CORE, to provide seamless integration and automation across various platforms, ensuring scalability and security for institutions.

Data Privacy and Security

Enflux prioritizes data privacy and security by using robust measures to safeguard personal information and comply with industry standards such as FERPA and SOC2. Our secure data storage is powered by the multi-layered protection of the AWS ecosystem.

Support

Our Customer Success Team is committed to your success with Enflux. They are available to provide expert support, help with onboarding, offer monthly training sessions, and ensure you make the most of our platform to streamline management and enhance decision-making.
