Vocational Education User Group

Kick Off

31st October 2019

Canvas User Groups

- Customer led, Instructure nurtured

- Chaired by a member/s of the user group

- Runs on a agreed cadence determined by the user group

- User group can be run in person or online

- The user group has an agreed objective

- Members need to be customers and not prospects/pilots

The Role of Instructure

- Sourcing Speakers from different areas both Internally and Externally

- Facilitate a face to face event (opportunity to leverage things like CanvasCon, VELG etc)

- Product highlight updates

- Being the voice of the User group within Instructure
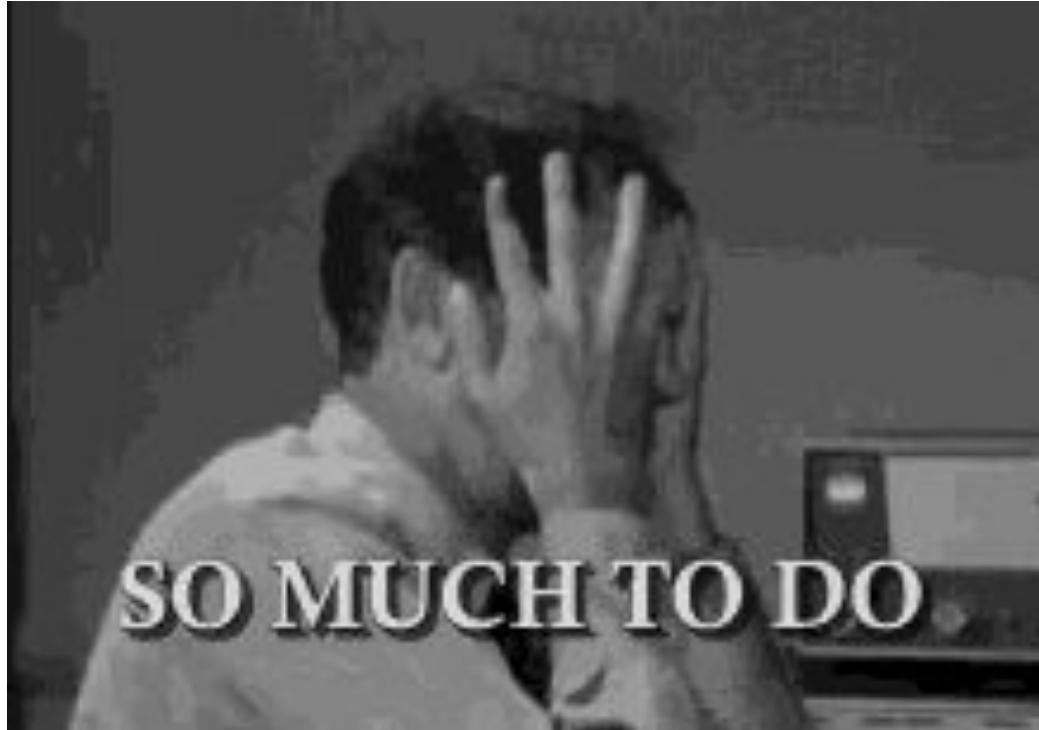

- Fostering relationships between customers

What is the objective of this group?

- What are our thoughts on this?

Our First Group Chairs!

- **Damian Noud - MRWED**
- **Marion Weeks - TasTAFE**

When shall we meet?

Where shall we meet?

- Online vs face-to-face meet-ups

What shall we discuss?

- Agenda for each meeting with specific topic/s

- Responses from the initial reach out

  - Meeting compliance requirements
  - Percentage scoring - Does this cause challenges for others?
  - Rolling Intake model
  - Feature Options - how do you configure them?
  - Skill-based assessment using canvas
  - User engagement, improving tutor buy-in and the perception of LMS utility
  - Managing observations and multiple attempts

  - New features in Canvas and VET application
  - 3rd party apps/LTIs
  - Scorm and API
  - Media platforms used for RTO/Tafe's
  - Quizzes
  - Conferences
  - Quality/version control
  - Blueprints for RTOs

Recording the Awesomeness

- Meeting minutes as Blog posts in the Community Group

- Facilitate continued conversation and exploration of topics beyond the meet-ups

The VET Community
https://community.canvaslms.com/groups/vet

- Dedicated space for all things related to this sector

- User Group events and meeting minutes

- Single source of interaction, collaboration and resources

- Let's take a look!

Institution Profiles

- Optional, but recommended!

- Opportunity to showcase your features / LTIs / configurations

- Align with others using Canvas in a similar way

Top 10 Feature Requests

- Record of the most relevant requests for the VE sector

- Where shall these be documented and maintained?

- Needs to be living and breathing
